

TEXAS COUNCIL OF ENGINEERING COMPANIES

2009 Texas CEC Engineering Excellence Awards

The Engineering Excellence Awards Competition has been held by the Texas Council of Engineering Companies since its inception in 1975 to honor and recognize outstanding achievements within the engineering community.

The distinguished panel of judges from around the state selected 12 Gold Medal and 7 Silver Medal winning projects from a broad field based on uniqueness, originality, technical, value to the engineering profession, complexity and how successfully the project met the needs of the client.

The Texas Council of Engineering Companies would like to thank the many extraordinary member firms that entered their projects this year and we hope that many more will join us next year.
